

Stadium Canopy

The Stadium Canopy is a cantilevered freestanding steel structure that slopes to the rear to divert rainwater into the aluminium drainage system.

The name is derived from the 'œstadium' shaped corrugated steel roof. The design utilises below-ground fixings and a branching structure to secure the canopy in 8 points.

Customisable options include:

- Powder coating in a range of RAL colours
- Bespoke sizes available on request
- Green roof options

Advantages of this design include:

- Does not require fixing to the building
- Can be designed to fit the space available
- Durable and Low Maintenance
- Increases usability and value of a space

Ideal for:

- Business parks
- Schools/Universities
- Retail/Hospitality

Our steel structures are manufactured to BS EN 1090 standards.
